

National Hospice Palliative Care Day for Children 2020

MYTH

vs.

Fact

Hospice palliative care is only for seniors.

Hospice palliative care is provided for people of all ages, including children with serious illness.

Paediatric palliative care is just like adult palliative care – right?

Canuck Place Hospice differs from an adult hospice. A child is normally part of our program for 7 years and their family will be in bereavement for about 3 years.

Canuck Place Children's Hospice is where a child goes for end-of-life care.

End-of-life care is just one aspect of the Canuck Place program. When a family comes to Canuck Place, the end of the story is already known. But the journey to get there has yet to be written.
